

# SUPERHEROES

Name \_\_\_\_\_

Science fiction writers are always searching for good ideas that will capture the interest of their readers. A common premise was that radiation somehow altered biological processes, transforming normal human beings into superhumans, some good and some evil. One example is the Incredible Hulk.

Your task is to create your own superhero by pretending that it is possible to magnify the abilities governed in selective sites in the human brain. You may find it helpful to begin by listing the component parts of the brain and their functions. **Identify the area of the brain that would have to be altered to accomplish skills** you've determined are important for your character. **You must choose 5 of these components to include in your superhero.** Some of these components will be necessary to accommodate the characters new skills while some will be the ones altered to produce the new characteristics.

## You will need to:

- Draw your superhero or use the outline provided. Must be colored. (\_\_\_\_\_/ 2 Points)
- Design a costume / outfit that reflects his/her main ability (\_\_\_\_\_/ 2 Points)
- Name your character (\_\_\_\_\_/ 2 points)
- Determine and label the super abilities she/he possess (\_\_\_\_\_/ 5 points)
- Identify the brain structures that will need to be augmented to accommodate the new super skill (\_\_\_\_\_/ 10 points)
- Identify a simple plot that would encourage this superhero to come to the rescue (\_\_\_\_\_/ 4 points)

Total Points: \_\_\_\_\_ / 25
